EDUCATION

University of Management & Technology

Bachelor of Science in Software Engineering | CGPA: 3.30

Lahore, Pakistan

Aug. 2022 – Jun. 2026

EXPERIENCE

Frontend Developer Intern

Jun. 2025 – Aug. 2025

OptimusFox

Lahore, Pakistan

- Built and optimized production-grade UI components using React.js with advanced patterns including custom hooks and compound components
- Implemented server-state management using React Query (TanStack Query), reducing redundant API calls and improving data-fetching performance
- Integrated RESTful APIs in collaboration with backend developers to ensure seamless data flow across the application
- Participated in code reviews, sprint planning, and Agile development workflows within a professional team environment

PROJECTS

Driver Monitoring System | React.js, Node.js, Firebase, TensorFlow Lite, MediaPipe, Cloudinary 2025 – 2026

- Built an end-to-end AI-powered fleet safety platform with an Android mobile app and a React.js web dashboard, developed in a team of three using Agile Scrum with Jira
- Implemented on-device ML (TensorFlow Lite, MediaPipe) to detect 6 unsafe driving behaviors in real time – drowsiness, yawning, distraction, phone usage, seatbelt violations, and smoking – with 4-level severity classification and instant visual/audio alerts
- Integrated AI-based facial recognition for driver identity verification at session startup; synchronized violation snapshots to Firebase Firestore and Cloudinary in real time
- Developed web dashboard for fleet managers featuring driver risk score tracking, violation records with snapshot evidence, CNIC/license document management, and automated daily safety reports

AI-Powered Job Board & Marketplace | Next.js 16, TypeScript, Prisma, PostgreSQL, Stripe, Clerk 2026

- Built a dual-role platform for employers and candidates featuring AI resume parsing, job match scoring, and cover letter generation using Gemini API with real-time streaming
- Implemented AI match scoring that analyzes candidate skills against job requirements, returning a score, matched strengths, and skill gaps per application
- Integrated Stripe payments for job postings, Clerk multi-role authentication (Employer/Candidate), and Resend for transactional email notifications
- Deployed on Vercel with Server Actions, Prisma ORM on Neon PostgreSQL, and JWT-secured API routes

AI E-Commerce Store | Next.js 16, TypeScript, Prisma, PostgreSQL, Stripe, Upstash Redis 2026

- Built a full-featured e-commerce store with AI product recommendations, semantic search via pgvector, and a streaming AI shopping assistant chatbot powered by Gemini API
- Implemented Stripe Checkout, session-based cart management with Upstash Redis, and order confirmation emails via Resend
- Developed an admin panel with product CRUD, AI-generated descriptions, order management, and a revenue analytics dashboard

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C/C++, SQL, HTML/CSS

Frontend: React.js, Next.js, Redux/Zustand, Tailwind CSS, Material UI, shadcn/ui, React Query

Backend & Databases: Node.js, Express.js, MongoDB/Mongoose, PostgreSQL, Firebase, Prisma ORM, REST APIs

Tools & Platforms: Git/GitHub, Docker, Vercel/Netlify, Postman, VS Code, Linux/Bash, Jira
